Flutter Basics:

1.Different types of widgets

a. Output & Input(visible)

Text(),Card(),ElevatedButton(),Icons()etc...

b.Layout & Control(Invisible)
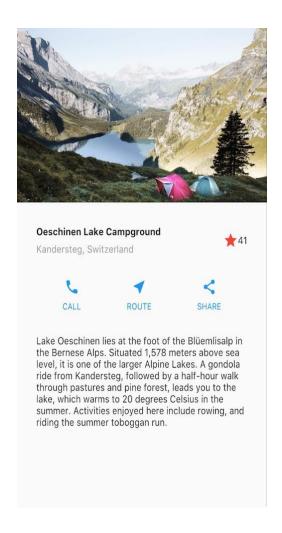

Row(),Column(),ListView(),Container() etc..

2.Stateless vs Stateful widget

3.Custom widget

Task1

Create this single page screen using flutter basics.

(use any image as asset)

Task2

Create this screen variation using any package available in flutter (null safety)
